CAUTION: This email was received from an external source

I am retired as General manager of awwu, and sit oN the municipal watershed and natural resources commission.

I recently was provided a Pdf copy OF the draft study plan prepared by mcmillen jacobson. I found it to be comprehensive and professional. I would like to see greater detail in the plan for assessment of The threat of bed scour and horizontal channel migration oN the alignment and integrity of the awwu water pipeline in the eklutna river valley.

Please advise on how This issue is to be addressed for varIous flow regimes.

Thank you for your consideration.
